THE ULTIMATE SKIN CARE AT  
THE HIGHEST LEVEL.

A new era of beauty products. A new spirit of the times.

A new formula for perfection:

A 100% high-tech product = A 100% organic product

This perfect synergy between high-tech and organic provides exclusive beauty care with an intensive effect against skin damage and the effects of time, so that your skin returns to its origin and regains its youthfulness.

## LUXURY

---

BE IN BLOSSOM has realised unique formulas for you with effective substances, the rarest ingredients, and precious essences from around the world, to give to give you something special,

A TRUE LUXURY -  
BEAUTY AND TIME ...

## BLACK CORAL

---

The ocean, that mysterious world, is at the centre of the BLACK CORAL product. Certain seaweeds exhibit outstanding hardiness. They can survive and propagate despite extreme living conditions and the strongest sunlight. They owe this ability to their protective matrix - a powerful antioxidant system. These unusual molecules are now available as organic high-tech care.

BLACK CORAL controls the time code of your skin.

The highly effective carotenoid extract from *microalgae haematococcus pluvialis* exhibits a very intense effect and a global anti-ageing effect.\*

Its antioxidant action is:

**6.000**

times higher than  
vitamin C

**800**

times higher than  
coenzyme Q10

**560**

times higher than  
green tea extract

**75**

higher than  
alpha-lipoic acid

Highly active Phyto stem cells from *sea holly* protect the skin's own stem cells at all levels - genes, cells, matrix - and the entire fabric. They stimulate cell energy and strengthen the skin structure. With each application, they stimulate the collagen structure to reduce wrinkles and attain firmness and radiance for your skin.\*

Phyto stem cells are found only in face-tuning serum.

The maritime extract *fucus vesiculosus*, also called bladderwrack, regulates cellular respiration and reliably stimulates skin moisturisation and firmness. The many essential trace elements regenerate and remineralise your skin, and soothe stressed skin areas.

\* Test in-vitro / in-vivo

## MULTILEVEL-EFFECT

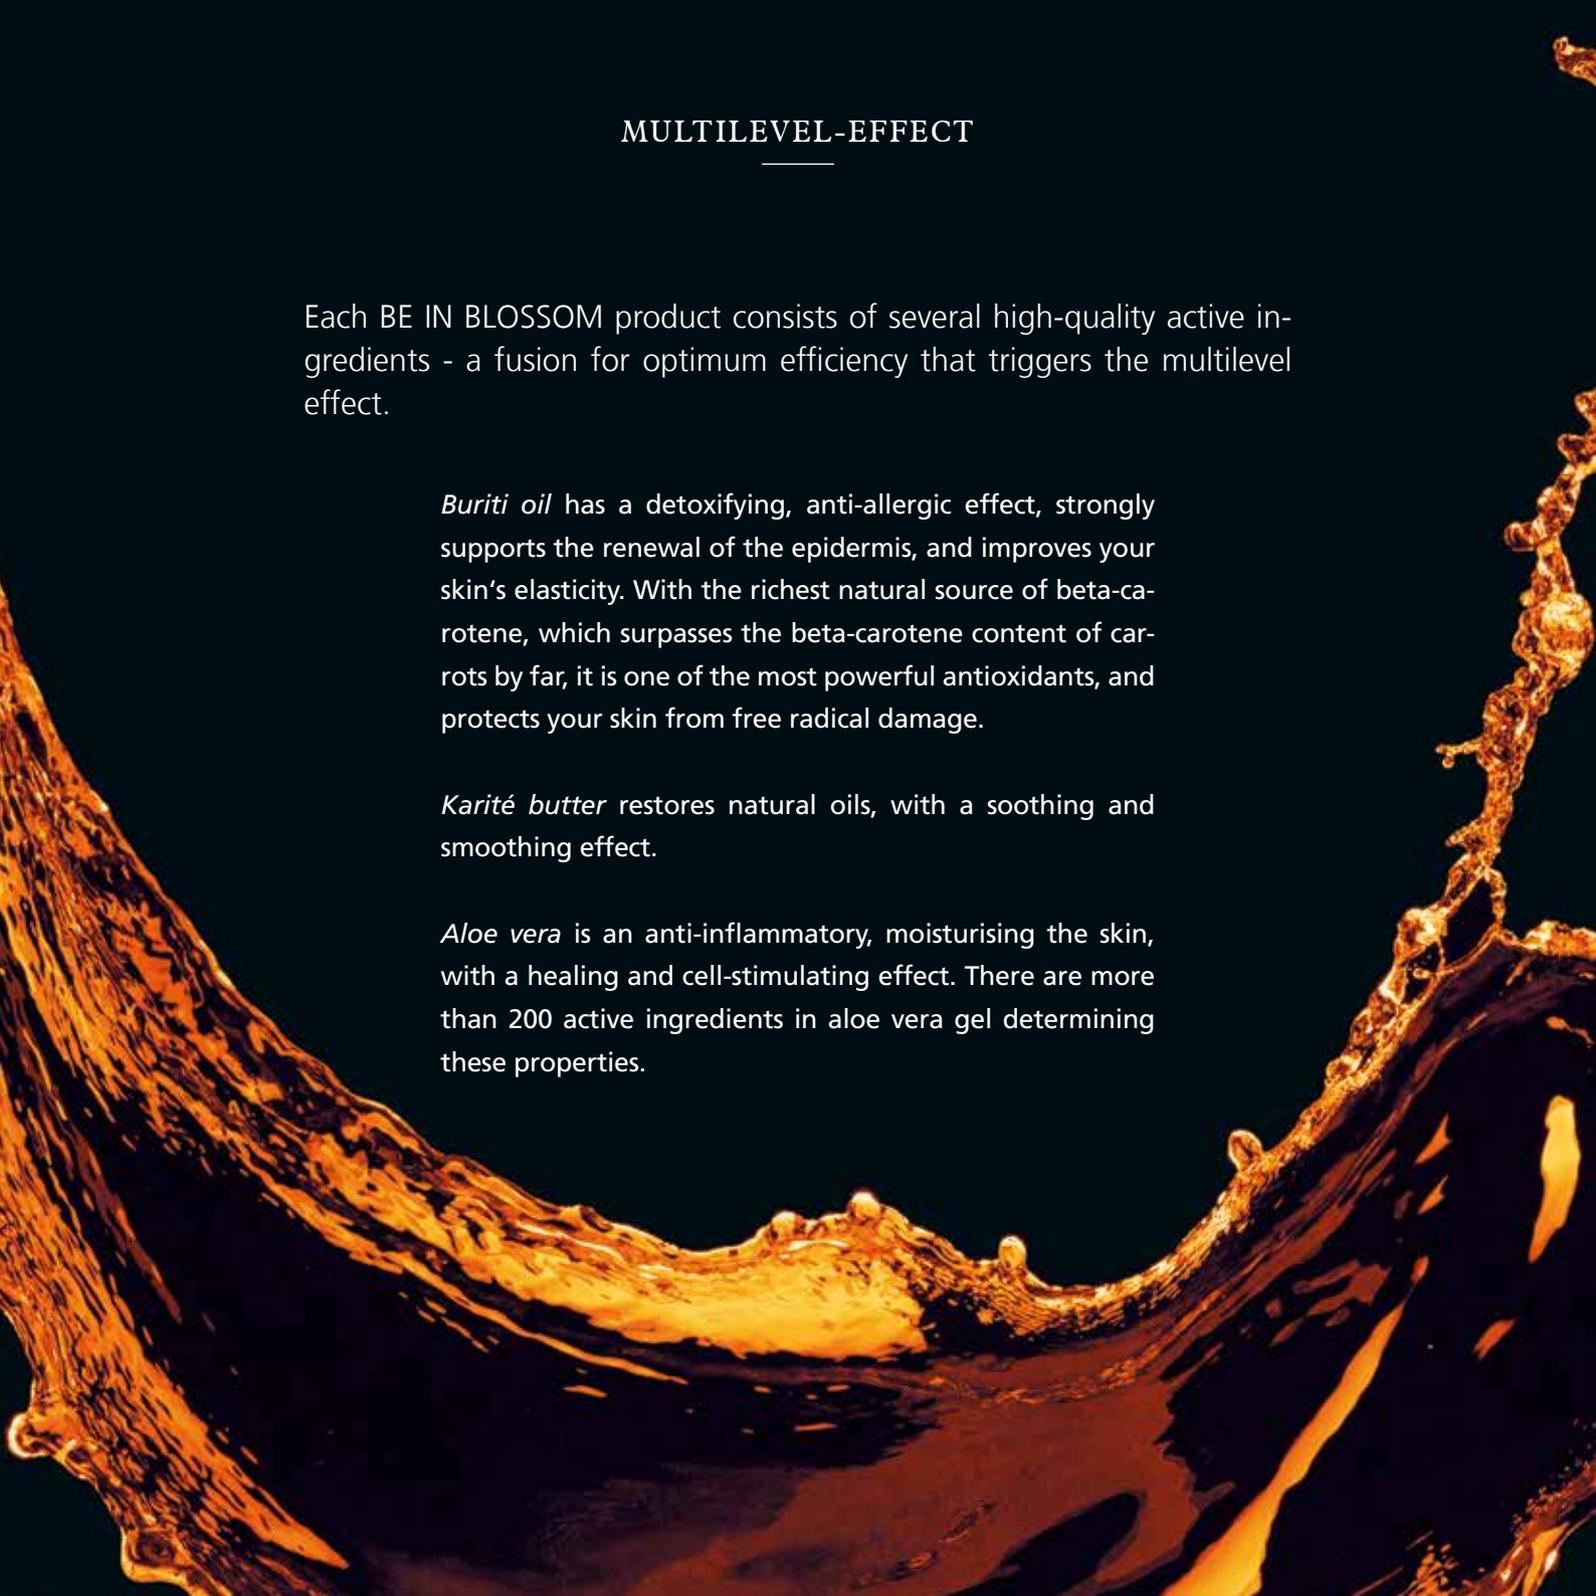

---

Each BE IN BLOSSOM product consists of several high-quality active ingredients - a fusion for optimum efficiency that triggers the multilevel effect.

*Buriti oil* has a detoxifying, anti-allergic effect, strongly supports the renewal of the epidermis, and improves your skin's elasticity. With the richest natural source of beta-carotene, which surpasses the beta-carotene content of carrots by far, it is one of the most powerful antioxidants, and protects your skin from free radical damage.

*Karité butter* restores natural oils, with a soothing and smoothing effect.

*Aloe vera* is an anti-inflammatory, moisturising the skin, with a healing and cell-stimulating effect. There are more than 200 active ingredients in aloe vera gel determining these properties.

*Moringa oil*, which was called *baq* in ancient Egypt, is the mythical oil of the moringa tree, which was reported 5000 years ago in the ancient Vedas. Moringa oil has 46 different antioxidants and has skin-rejuvenating and skin-renewing properties.

*Babassu oil* is excellent for supporting natural elasticity, to keep your skin soft and supple.

A precious fragrant essence of pure plant extracts not only adds a sensual aromatherapy effect, but also introduces an effect into the product. A rare fragrance extract from the *algae fucus vesiculosus* characterises the perfume, which lends the product a particularly authentic maritime touch, and an invigorating, toning effect. Precious natural essences like *vetiver bourbon* and *petitgrain bigarade* also underscore the fragrance, adding their cell regenerating, antiseptic, and calming effect.

### Face-Tuning Serum 30 ml

This intensive Face-Tuning care product, as light and deeply effective as a serum, as nourishing and protective as a cream, is a true all-round talent. The powerful combination of active ingredients based on maritime technology acts on several levels simultaneously. While highly effective microalgae extract from *h. pluvialis* produces a global anti-ageing effect, and the algae extract from *fucus vesiculosus* calms stressed skin areas, the active phyto stem cells from *sea holly* stimulate the energy production of skin cells and repair skin damage. For a vital and youthful appearance. The masculine scent of a fresh sea essence made of pure plant extracts pampers the skin and the senses with its aromatic and soothing properties. The extra light texture absorbs immediately, providing a pleasant feeling of comfort. It is ideal in everyday life, after shaving, and for all sports activities. Suitable for all skin types.

### Face-Tuning Lotion 50 ml

The revitalizing Face-Tuning Lotion supports the skin's own renewal process with the regenerating elemental force of the sea. Oils and extracts rich in active ingredients penetrate the skin quickly and deeply, providing intense care. The masculine scent of a fresh sea essence, made from pure plant extracts, indulges the skin and the senses with its aromatic and soothing properties. Ideal care for everyday life, after shaving and for all sporting activities. Suitable for all skin types.
