BE IN BLOSSOM will accompany you along the way.

HIGHTECH ORGANIC

be in blossom

THE ULTIMATE SKIN CARE AT
THE HIGHEST LEVEL.

A new era of beauty products. A new spirit of the times.

A new formula for perfection:

A 100% high-tech product = A 100% organic product

This perfect synergy between high-tech and organic provides exclusive beauty care with an intensive effect against skin damage and the effects of time, so that your skin returns to its origin and regains its youthfulness.

LUXURY

BE IN BLOSSOM has realised unique formulas for you with effective substances, the rarest ingredients, and precious essences from around the world, to give to give you something special,

A TRUE LUXURY -
BEAUTY AND TIME ...

OCEAN FLOWER

The ocean, that mysterious world, is at the centre of the OCEAN FLOWER product. Certain seaweeds exhibit outstanding hardiness. They can survive and propagate despite extreme living conditions and the strongest sunlight. They owe this ability to their protective matrix - a powerful antioxidant system. These unusual molecules are now available as organic high-tech care.

OCEAN FLOWER controls the time code of your skin.

The highly effective carotenoid extract from *microalgae haematococcus pluvialis* exhibits a very intense effect and a global anti-ageing effect.*

Its antioxidant action is:

6.000

times higher
than vitamin C

800

times higher than
coenzyme Q10

560

times higher than
green tea extract

75

higher than
alpha-lipoic acid

Highly active Phyto stem cells from sea *holly* protect the skin's own stem cells at all levels - genes, cells, matrix - and the entire fabric. They stimulate cell energy and strengthen the skin structure. With each application, they stimulate the collagen structure to reduce wrinkles and attain firmness and radiance for your skin.*

The powerful extract from *alaria esculenta*, also called badderlocks, unfolds your skin's anti-radical and anti-oxidant activity, effectively preventing elastin and collagen degradation, improving cell energy and increasing skin synthesis, which is responsible for taut, youthful skin.*

* Test in-vitro / in-vivo

MULTILEVEL-EFFECT

Each BE IN BLOSSOM product consists of several high-quality active ingredients - a fusion for optimum efficiency that triggers the multilevel effect.

Cupuaçu butter has an extremely high water absorption capacity, which is about 120% higher than lanolin, thus supporting restoration of the skin's natural moisture. Like beta-sitosterol, the phytosterols it contains act at the cellular level and regulate lipid activity at the skin's uppermost layers.

Karité butter restores natural oils, with a soothing and smoothing effect.

Aloe Vera is an anti-inflammatory, moisturising the skin, with a healing and cell-stimulating effect. There are more than 200 active ingredients in aloe vera gel determining these properties.

Moringa oil, which was called baq in ancient Egypt, is the mythical oil of the moringa tree, which was reported 5000 years ago in the ancient Vedas. Moringa oil has 46 different antioxidants and has skin-rejuvenating and skin-renewing properties.

Babassu oil is excellent for supporting natural elasticity, to keep your skin soft and supple.

A precious fragrant essence of pure plant extracts not only adds a sensual aromatherapy effect, but also introduces an effect into the product. A rare fragrance extract from the *algae fucus vesiculosus* characterises the perfume, which lends the product a particularly authentic maritime touch, and an invigorating, toning effect. Precious natural essences like *jasmine grandiflorum* and *ylang-ylang* also underscore the fragrance, adding their cell renewing, tissue-strengthening, and circulation-promoting effect.

OCEAN FLOWER

Multi-Complex Serum + Cream 30ml

This luxurious multi-complex care product, as light and deeply effective as a serum, as nourishing and protective as a cream, is a true all-round talent. A powerful combination of active ingredients based on maritime technology acts on several levels simultaneously. While highly effective microalgae extract from *h. pluvialis* produces a global anti-ageing effect, the active phyto stem cells from *sea holly* provide support, and the algae extract *alaria esculenta* stimulates the energy production of skin cells and repairs skin damage. For a radiant and youthful appearance.

The precious scent of a fresh sea essence made of pure plant extracts pampers the skin and the senses with its aromatic and soothing properties.

The lightweight, silky smooth texture absorbs quickly and conveys a wonderful feeling of comfort. It is ideal for everyday life, as a make-up base, and for all sports activities. Suitable for all skin types.
